

Outdoor readable at EZ prices!!

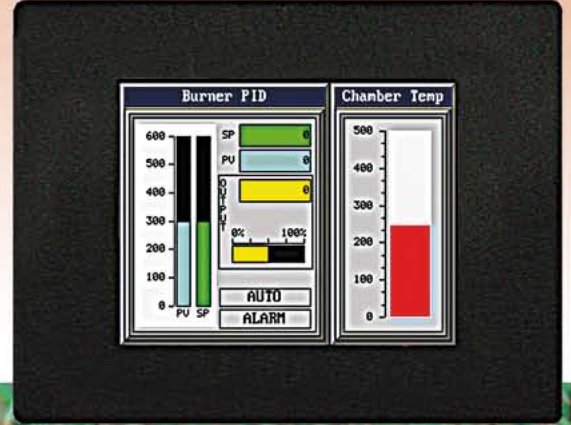

New technology: Low power, less heat

NEW

Tested and proven in the Australian Desert

The outdoor readability of the EZSeries brighter touchpanels has been tested for use in the Australian desert.

New transfective technology minimises power consumption and heat

The EZSeries brighter touchpanels available in 6" and 10" models utilises a new transfective LCD technology, allowing the screen to be visible even under bright outdoor conditions. The transfective LCD reflects back the UV component of sunlight.
